Challenges the Project Seeks to Address:
- Multi-disciplinary research will be strengthened by offering opportunities to researchers to collaborate
- There is a need for computing and research support at institutions at all levels of learning
- Research projects need more than enablement to succeed

Scientific Impact:
- Holistic vision for researcher success with CI envisioned
- Pushes envelope from cyber training to cyber research support
- Enablement is reimagined
- Regional MSI, emergent MSIs non-profits and industry learn together
- Three-pronged evaluation strategy

Deliverables:
- Research exchange supports 20+ fields of science
- A boots-on-the-ground approach using existing CI resources is adopted
- All institutions are providers and consumers
- Site ambassadors support campuses
- Educational resources developed
- Engage community colleges
- Rotating annual conference and annual site activities

The Team:
- Texas A&M, TACC at UT Austin, New Mexico State, West Texas A&M, UT San Antonio, Texas A&M San Antonio, University of Arizona, and Prairie View A&M,
- LEARN, GCP, AWS, Texas A&M AgriLife, and the National Center for Genome Research

Project Updates:
- Stay tuned for updates at https://hprc.tamu.edu/sweeter/
- Lots of faculty and student programs
- Need more funds to support programs at other MSIs!

SWEETER gratefully acknowledges support by the NSF (Award #OAC 1925764)
